Partnership to Improve Care And Translate Evidence for Seniors (PICANTES):

Letter of Agreement

[Facility/Site Name]
[Address]
[City, State, Zip]

We are excited to sign-on as members of this partnership that is committed to improving the lives and care for people in nursing homes and care communities. [Facility Name] is a Skilled Nursing Facility with over [###] licensed beds.

As members of PICANTES, we understand we will have access to benefits such as interdisciplinary continuing education for our staff as well as limited clinical or administrative consulting. We look forward to participating in meaningful research that addresses issues that are important to us and our residents. For our part, we will work with Penn faculty to provide letters of support for grant applications and obtain oversite and corporate/organizational approval for participation in relevant studies. We will also work to support this partnership by raising awareness and encouraging facility leadership and staff to participate in active studies and assist researchers in identifying potential participants.

We understand that circumstances change and our ability to participate may change over time. If, in the future, we are no longer interested or able to participate, we will notify the Penn members of this Partnership as soon as is reasonably possible.
